PREFACE

While it must be granted that in the face of a bewildering mass of legends and fabulous traditions it is hopeless to attempt to glean anything like authentic information concerning China's earliest civilisation, it is, nevertheless, amply proved that even as far back as the days of the Chaldeans, the Chinese possessed a method of recording time not differing essentially from that of the present day. The early existence of this method accounts no doubt, in a great measure, for the fact that many interesting events of the past have been chronicled and handed down in a comparatively connected and intelligible manner.

The idea of numbering days from one full moon to another is so natural in itself that the Chinese were not the only people in the world who based their chronology on the apparent revolutions of the moon round the earth. But a system founded on lunations pure and simple, and not regulated by the sun, was bound in process of time to throw the seasons out and to fall behind; and that is precisely what happened. The **史記**, or Book of Records, states that during the reign of the Emperor Yao, 2357—2255 B. C., it became necessary to correct the Calendar and to fix the seasons, so that the people could be guided in their cultivation of the land. With this aim in view, that famous ruler directed his astronomers to determine the equinoxes and solstices, and it was then that the intercalary “moon”, **閏月**, was instituted to make up the difference between the lunar and solar years.

Roughly speaking, two intercalary “moons” occur in five years; or more correctly, there are seven intercalary “moons” in every nineteen years. The method of intercalation has differed at various periods, but at present it consists simply of duplicating a certain “moon” so that the Vernal Equinox, **春分**, shall invariably fall in the second “moon” of the year, sometime about the 21st of March; the Summer Solstice, **夏至**, in the fifth “moon”, about the 21st of June; the Autumnal Equinox, **秋分**, in the eighth “moon”, about the 23rd of September; and the Winter Solstice, **冬至**, in the eleventh “moon”, about the 22nd of December. The eleventh, twelfth, and first “moons” are never duplicated. By this system of adjusting the lunar year to the solar year, New Year's day is made to fall on the first new moon occurring after the sun has entered Aquarius, not sooner than the 20th of January and not later than the 19th of February.

The invention of the Sexagenary Cycle, **六十花甲子**, is ascribed to Ta Nao, **大撓**, a Minister of the Emperor Huang Ti. Huang Ti commenced his reign in the year 2697 B.C., and the first year of the first Cycle dates from the sixty-first year of his reign, *i.e.*, 2637 B. C. Thus the year 1905 is the 42nd year of the the 76th Cycle, or the 4542nd of the system of Cycles, the longest unbroken chronological period on record. Each of the sixty years comprised in a Cycle is denoted by a **年綱**, or Cyclical Term. The terms are obtained from two sets of characters called the **十天干**, or “ten Celestial Stems”, and the **十二地支**, or “twelve Terrestrial Branches,” which run as follows:

	<i>a</i>	<i>b</i>	<i>c</i>	<i>d</i>	<i>e</i>	<i>f</i>	<i>g</i>	<i>h</i>	<i>i</i>	<i>j</i>	
10 STEMS:	甲	乙	丙	丁	戊	己	庚	辛	壬	癸	
	<i>Chia</i>	<i>Yi</i>	<i>Ping</i>	<i>Ting</i>	<i>Wu</i>	<i>Chi</i>	<i>K'eng</i>	<i>Hsin</i>	<i>Jên</i>	<i>Kuei</i>	
	1	2	3	4	5	6	7	8	9	10	11
12 BRANCHES:	子	丑	寅	卯	辰	巳	午	未	申	酉	戌
	<i>Tz'u</i>	<i>Ch'ou</i>	<i>Yin</i>	<i>Mao</i>	<i>Ch'ên</i>	<i>Ssü</i>	<i>Wu</i>	<i>Wei</i>	<i>Shên</i>	<i>Yu</i>	<i>Hsü</i>

The characters taken in pairs, one from the “stems” and one from the “branches,” form the sixty combinations, or cyclical terms, given in their proper sequence in this work. From *a-1* to *j-10* are the first ten terms; the eleventh term is *a-11*; the thirteenth is *c-1*; the twenty-first is *a-9*; the

thirtieth is $j-6$; the thirty-seventh is $g-1$; the forty-first is $a-5$; the fifty-first is $a-3$; and the sixtieth is $j-12$. The "stems" are thus repeated six times and the "branches" five times; the characters then revert to their original position and a new Cycle commences. To be strictly correct it may be stated that the Chinese have not numbered their Cycles as done here; each cycle is taken as a complete period. Years are spoken of, sometimes by their cyclical term, but generally, as the 1st, 2nd, 3rd, etc., of the reign of the Emperor, and a new reign invariably begins with the New Year.

The attainments in the science of astronomy possessed by the Chinese who had the supervision of the Calendar were, however, inadequate to keep out discrepancies as time went on. At the commencement of the present dynasty the Calendar contained sufficient anomalies to render a revision highly desirable, and Johann Adam Schaal, one of the talented founders of the Jesuit Mission in China, was entrusted by the Emperor Shun Chih (1644–1662 A.D.) with the work. But during the short interval between the time of Schaal's death and the appointment of Ferdinand Verbiest as the President of the Board of Astronomy, in the reign of K'ang Hsi (1662–1723), confusion again crept in, and an intercalary "moon" was erroneously inserted for 1669. To rectify matters the year had to be shortened, as, according to Verbiest's own words, he was unable to make the heavens agree with the Calendar. In 1813 a similar error had to be corrected; the eighth "moon" was wrongly duplicated, as it brought the Winter Solstice into the tenth "moon". An intercalary second "moon" for the following year was introduced instead.

There can be no doubt that the early Jesuit Fathers did valuable work in connection with the revision of the Imperial Calendar which covered a period of 397 years from 1624 to 2020. An abridged version of this Calendar called the 萬年書 is published for the use of the people by Imperial command, and a very useful manual relating to it has been compiled by the Rev. Peter Hoang, a Priest of the Nanking Mission.*

In addition to this Calendar the Government issues annually an Almanac containing, besides the Calendar for the year, a fund of details relating to astrology, lucky days, etc., to which the utmost importance is attached; indeed, the importance is so great that any person reproducing the Almanac is liable to severe punishment, and the penalty for falsifying its contents is death. It happens sometimes, though very rarely, that for some reason or other, the 欽天監 or Board of Astronomy at Peking, which has the preparing of this Almanac, deems it expedient to differ from the Imperial Calendar. The difference takes the form of curtailing a long "moon" of 30 days by one day, and tacking that extra day on at the end of the succeeding short moon of 29 days, making it 30 days. This departure from the pre-established, though luckily not affecting the total number of days in the year, nor any of the other "moons," throws out the short "moon" concerned by causing it to begin a day earlier. In such an eventuality in the future, against which there are no possible means of providing, any "moon" so dealt with in the annual Almanac will obviously disagree with the same "moon" in the present work, and in that case there will be no alternative but to make the corresponding change. In the few instances where alterations have been effected in past years, the same changes have been made here to conform with the annual Almanac.

The Chinese "moons" are ordinarily described as the 2nd, 3rd, 4th, etc., of the year, except the 1st "moon," which is 正月. For the sake of greater distinctness they are indicated in this volume by Roman figures. For astronomical purposes the "moons" are named after the "twelve branches" given above, commencing, however, always with the "moon" immediately preceding the Winter Solstice. The "twelve branches" are also applied to designate days and the twelve parts, or hours, into which the day is divided. The first hour, from 11 p.m. to 1 a.m. is called the 子時; the second, from 1 to 3 a.m. is the 丑時, and so on. The seventh is noon, or 午時, *i.e.*, 11 a.m. to 1 p.m.; mid-day is 正午, or "high noon"; the character 正 being prefixed to denote the middle of the hour in each case.

*Published in English by the Siewwei Press in 1885.

In the 爾雅, said to be the oldest Encyclopædia in existence, the “moons” are given the following names :

I moon	II moon	III moon	IV moon	V moon	VI moon
觺 <i>Tson</i>	如 <i>Ju</i>	寗 <i>Su</i>	余 <i>Yü</i>	皐 <i>Kao</i>	且 <i>Chü</i>
VII moon	VIII moon	IX moon	X moon	XI moon	XII moon
相 <i>Hsiang</i>	壯 <i>Chuang</i>	立 <i>Hsüan</i>	陽 <i>Yang</i>	辜 <i>Ku</i>	涂 <i>T'u</i>

In addition there exist other more or less fanciful and poetical terms, such as :

I	II	III	IV	V	VI
端元 月 <i>Tuan, or Yüan Yüeh</i>	杏花 月 <i>Hsing, or Hua Yüeh</i>	桃桐 月 <i>T'ao, or Tung Yüeh</i>	槐 月 <i>Huai Yüeh</i>	蒲榴 月 <i>P'u, or Lin Yüeh</i>	荷 月 <i>Ho Yüeh</i>
VII	VIII	IX	X	XI	XII
桐巧 月 <i>Tung, or Ch'iao Yüeh</i>	桂 月 <i>Kuei Yüeh</i>	菊 月 <i>Chü Yüeh</i>	梅 月 <i>Mei Yüeh</i>	仲冬 冬月 <i>Chung Tung, or Tung Yüeh</i>	臘 月 <i>La Yüeh</i>

Another series is :

I	II	III	IV	V	VI
青三 陽和 <i>Ch'ing Yang or San Ho</i>	中花 和朝 <i>Chung Ho or Hua Ch'ao</i>	上蟄 巳月 <i>Shang Ssü or Ts'an Yüeh</i>	清 和 <i>Ch'ing Ho</i>	天滿 中月 <i>T'ien Chung or Man Yüeh</i>	伏暑 日月 <i>Fu Jih or Shu Yüeh</i>
VII	VIII	IX	X	XI	XII
中瓜 元月 <i>Chung Yüan or Kua Yüeh</i>	中 秋 <i>Chung Ch'iu</i>	重季 陽商 <i>Ch'ung Yang or Chi Shang</i>	陽下 春元 <i>Yang Ch'un or Hsia Yüan</i>	長葭 至月 <i>Ch'ang Chih or Chia Yüeh</i>	嘉 平 <i>Chia P'ing</i>

These “flowery” designations are only appropriate in compositions of an elegant style, or high literary standard, and are adopted to harmonise with the flowery language usually employed in such writings; they are never used in business or official documents.

In the classics the following appellations are given:

I	II	III	IV	V	VI
孟春 陽王 <i>Meng Yang, or Ch'un Wang</i>	仲 陽 <i>Chung Yung</i>	寒 食 <i>Han S'ih</i>	麥 秋 <i>Mai Ch'iu</i>	端 陽 <i>Tuan Yang</i>	天 貺 <i>T'ien K'uang</i>
VII	VIII	IX	X	XI	XII
蘭 月 <i>Lan Yüeh</i>	仲 商 <i>Chung Shang</i>	菊 秋 <i>Chü Ch'iu</i>	小 陽春 <i>Hsiao Yang Ch'un</i>	清 祀 <i>Ch'ing Ssü</i>	季 冬 <i>Chi Tung</i>

The 易經, or Canon of Changes, gives another list; the names, mostly used by fortune-tellers, are as follows :

I 泰 月 <i>Tai Yüeh</i>	II 大壯 月 <i>Ta Chuang Yüeh</i>	III 夬 月 <i>Kuai Yüeh</i>	IV 乾 月 <i>Ch'ien Yüeh</i>	V 垢 月 <i>Kou Yüeh</i>	VI 遯 月 <i>Tun Yüeh</i>
VII 否 月 <i>Pi Yüeh</i>	VIII 觀 月 <i>Kuan Yüeh</i>	IX 剝 月 <i>Pao Yüeh</i>	X 坤 月 <i>K'un Yüeh</i>	XI 復 月 <i>Fu Yüeh</i>	XII 臨 月 <i>Lin Yüeh</i>

Holidays and festivals are quite as numerous in China as anywhere else, if not more so; but the principal ones on which business is suspended and Government establishments closed are :

the New Year holidays, 新年, or 上元節
 ,, 5th day of 5th moon, 端陽節, Dragon-boat Festival
 ,, 15th ,, ,, 8th ,, 中秋節, Mid-Autumn ,,
 and the anniversary of the Emperor's birthday* 萬壽聖節

The New Year holidays are supposed to commence officially with the "sealing up of the seals," 封印 that is from the 20th day of the twelfth "moon" to the 20th day of the first "moon"; but the various establishments are not actually closed to the transaction of business during the whole period. The holidays observed by the Imperial Maritime Customs and Imperial Post Office at the treaty ports at this season are :—the last day of the year, New Year's day, and two days following; in all four days. The only Foreign holiday noted in this Calendar is Good Friday; the initial letters are printed in heavy type for each year. Other holidays observed by Foreigners in China, such as Christmas, etc., falling on certain fixed dates, it has not been thought necessary to distinguish in any special way.

The period over which this work extends is presumed sufficient for the everyday purposes of the merchant, the missionary, and the official. It was originally designed that the undertaking should commence only from the date of adoption of the Gregorian Calendar in England in 1752; but in order to round off a full period of 250 years the dates have been worked back according to the "new style" from the 14th September 1752 to the 1st January 1751.

It is hoped that the bulkiness of the volume, which may perhaps be deemed a fault in days when reference books are required in the handiest and most portable dimensions, will be found fully compensated for by the plan on which the work has been carried out,—a plan which, while aiming at clearness and simplicity, has necessarily involved the sacrifice of compactness in some degree in order to avoid the crowding together of narrow columns of figures.

In presenting this volume to the public the Compiler trusts that it will supply a need which has not only constantly been felt, but which has often proved extremely difficult to meet. A double Calendar covering two and a half centuries will no doubt be appreciated by many in this country and regarded as a welcome addition to the works of reference in daily use.

C. K.

HOIHOW, HAINAN.

5th October, 1905.

* The birthday of the present Emperor is celebrated on the 26th day of the sixth moon; and in honour of the occasion during seven days (three days preceding and three days following the event) no punishments can be inflicted on prisoners. The same rule applies to the birthday anniversary of an Empress or Empress Dowager.

Table of the Twenty-four Solar Terms, or Sections into which the Chinese Year is divided.

TERM.			SUN'S POSITION IN ZODIAC.	APPROXIMATE DATE.
1	立春 <i>Li Chun</i>	Spring commences	15° in Aquarius	5. February
2	雨水 <i>Yü Shui</i>	Spring showers	Enters Pisces	19. „
3	驚蟄 <i>Ching Chih</i>	Insects waken	15° in „	5. March
4	春分 <i>Chun Fên</i>	Vernal Equinox	Enters Aries	21. „

21	大雪 <i>Ta Hsüeh</i>	Heavy snow	15° in „	7. December
22	冬至 <i>Tung Chih</i>	Winter Solstice	Enters Capricorn	22. „
23	小寒 <i>Hsiao Han</i>	Moderate cold	15° in „	6. January
24	大寒 <i>Ta Han</i>	Severe cold	Enters Aquarius	20. „

The Twenty-eight Constellations.

In Chinese almanacs days are denoted by the names of the twenty-eight Constellations. The Constellations do not in any way accord with our signs of the Zodiac; but it may be interesting to note that repeated in the same regular order to designate days of the "moon", four of the names, as a natural consequence, mark each of our days of the week.

The sub-joined table gives the order in which the Constellations follow, and the days of the week with which they always coincide :

二 十 八 宮

THURSDAY	FRIDAY	SATURDAY	SUNDAY	MONDAY	TUESDAY	WEDNESDAY
1 角 <i>Chüeh</i>	2 亢 <i>K'ang</i>	3 氏 <i>Ti</i>	4 房 <i>Fang</i>	5 心 <i>Hsin</i>	6 尾 <i>Wei</i>	7 箕 <i>Chi</i>
8 斗 <i>Tou</i>	9 牛 <i>Niu</i>	10 女 <i>Nü</i>	11 虛 <i>Hsü</i>	12 危 <i>Wei</i>	13 室 <i>Shih</i>	14 壁 <i>Pi</i>
15 奎 <i>K'uei</i>	16 婁 <i>Lou</i>	17 胃 <i>Wei</i>	18 昂 <i>Mao</i>	19 畢 <i>Pi</i>	20 觜 <i>Tzū</i>	21 參 <i>Ts'an</i>
22 井 <i>Ching</i>	23 鬼 <i>Kuei</i>	24 柳 <i>Liu</i>	25 星 <i>Hsing</i>	26 張 <i>Chang</i>	27 翼 <i>Yi</i>	28 轸 <i>Chên</i>

Monday, the 1st January, 1906, corresponds with 危, the twelfth Constellation.

Note. Mr. A. Wylie in an article published in the *Chinese Recorder* for June-July, 1871, mentions that the four Constellations for Sunday are denoted by the character 密, *Mi*, and represent the days of the Sun, 日, which is "called in the language of the West "*Mi*," the ruler of joyful events." In this connection, Mr. W. F. Mayers adds that "the sound *mi* has been traced to the Persian *Mitra* and other cognate sources; and there can be little doubt that the practice of marking the "days of the Sun" has crept into Chinese chronology from a Western quarter." *Chinese Reader's Manual*.

The Twelve Animals symbolising the Years of the Cycle are:

1 Rat	2 Ox	3 Tiger	4 Rabbit	5 Dragon	6 Snake	7 Horse	8 Sheep	9 Monkey	10 Fowl	11 Dog	12 Pig
鼠	牛	虎	兔	龍	蛇	馬	羊	猴	雞	犬	猪
<i>Shu</i>	<i>Niu</i>	<i>Hu</i>	<i>Tu</i>	<i>Lung</i>	<i>Shê</i>	<i>Ma</i>	<i>Yang</i>	<i>Hou</i>	<i>Chi</i>	<i>Ch'üan</i>	<i>Chu</i>

These animals are associated with the "twelve branches," and indicate the years in the same order; 鼠 corresponding with 子; 牛 with 丑, etc.

CALENDAR
